

## Sesame Street: Science and Curiosity Playlist

**Topic Page:**

[Science](#): The *Science* topic page is the go-to spot for access to all of our multimedia resources, including videos, articles, printable activities, interactives, and bundled resource workshops.

**Videos:**

[Exploring Outdoors](#): Watch Elmo, Abby, and Louie explore differences between leaves at the park. Then think about things you see in everyday life that appear similar, but upon closer observation, are actually quite different.

[Reuse](#): Watch this video together, then go through your own recycling bins to create a piece of art. It could be a sculpture of a robot, a hat, or anything else you can imagine.

[Just Ask!](#): Learning anything starts by asking just one question! Listen to this song together, then ask, "What are some questions you have?"

[Elmo's World: Building Things](#): Playing and sorting are signs of scientific curiosity. Watch along for more tips on how to foster that learning with your little engineers.

**Interactives:**

[Bert & Ernie Reuse & Reinvent!](#): Invite children to help Ernie and Bert in their upcycling adventure- even the smallest projects can inspire young children to care for the earth

**Articles:**

[Science and the Senses](#): The best way for kids to learn about the natural world is to explore and investigate... with all of their senses! Try these fun activities to explore science in everyday life:

[Upcycling Crafts](#): The smallest projects can teach young children to care for the earth, and the materials might already be in your recycling bin.

**Printable:**

[Blueprint for Upcycling](#): It's never too early to start planning ways to help take care of the planet. Invite children to color the boxes to show their ideas. Next time you have an empty box, try one of the plans!
